

*(b) Confidential*

8 projecting from each of the side walls, each protuberance  
9 having [an] a pointed apex facing the flange and spaced  
10 from the flange to define respective gaps for receiving  
11 the edges therein; and a bolt movably disposed in the  
12 housing and adapted for engaging a slide channel.

*Sub J*

13 *33.* (amended) A housing for installation in a  
14 window frame having a window sash with a notch defining a  
15 pair of opposed edges, the housing comprising:  
16       a first part defining exterior side walls having  
17 edges;  
18       a second part separate from said first part and  
19 defining interior side walls nested in the exterior side  
20 walls and a top wall extending beyond the interior side  
21 walls to define a flange, the edges of the exterior side  
22 walls being spaced from the flange; and  
23       [a protuberance] protuberances projecting from the  
24 edges of the exterior side walls and spaced from the  
25 flange to define respective gaps for receiving the  
26 respective edges of the notch therein.
